

## CHOPTANK COMMUNITY HEALTH DENTON, MARYLAND

Choptank Community Health Systems contracted Gillis Gilkerson to build a brand new +/- 20,797 square foot medical facility at 808 North 5th Street in Denton, Maryland. The team broke ground in August 2018 and promptly completed sitework and constructed the single-story brick building complete with a metal roof.

In addition to dentistry and behavioral health services, the new, state of the art facility houses family and pediatric medical care practitioners. Upon its opening, the Choptank Community Health Center will replace the System's former location on Daffin Lane.

*"This project was important to our ever growing community as it will only improve healthcare outcomes. We were fortunate to have the opportunity to build this all-encompassing facility for our region's mid-shore residents and their families"*

DWIGHT MILLER | EXECUTIVE CONSULTANT, GILLIS GILKERSON
