

DUNBARTON STATION APARTMENTS

GEORGETOWN, DELAWARE

Gillis Gilkerson was contracted by The Severn Companies to complete the full renovation of four two-story apartment buildings and ground-up construction of a community center at Dunbarton Station, an apartment complex in Georgetown, Delaware. Additionally, Gillis Gilkerson oversaw the addition of a community playground and campus-wide landscaping upgrades.

The \$2.8 million dollar project allowed for increased energy efficiency in terms of doors, windows and appliances in all thirty-two apartment units. Residents remained onsite while Gillis Gilkerson completed the necessary construction and development work. The project was completed in October 2013.

"We have worked with Gillis Gilkerson on a few projects and it has always been a very positive experience. Their fantastic work with the Fire Marshal helped us to get our residents moved back in a timely fashion."
