

MID-SHORE PEDIATRIC DENTISTRY

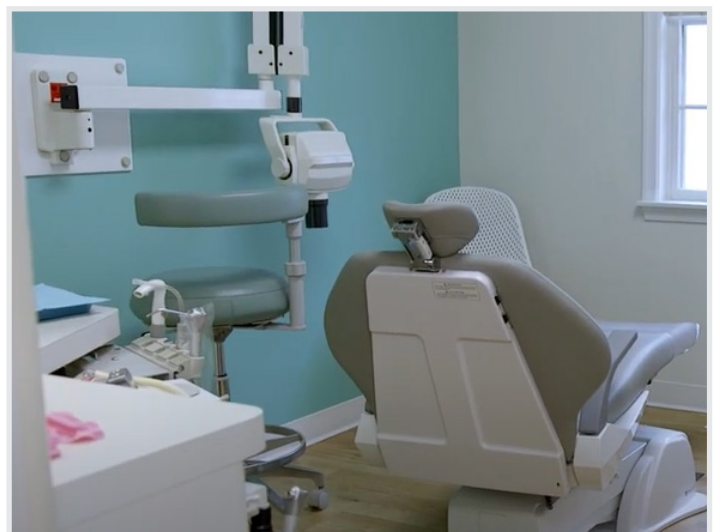

EASTON, MARYLAND

Gillis Gilkerson recently completed renovations at Mid-Shore Pediatric Dentistry located at 508 Cynwood Drive in Easton, Maryland. The 2,000 square foot renovation was undertaken to modernize an existing pediatric dental practice after being purchased by a new practitioner. Renovations to the space had several equally important goals; refresh the existing space to maintain optimal functionality for a dental practice, reduce disruption to the practice during business hours, and to create a bright and welcoming space for Mid-Shore Pediatric Dentistry's young patients.

Renovations included an updated floor plan, and all new flooring, paint, ceilings and lights. Bright accent colors helped to make the space inviting, and a keen understanding of the dentistry field helped Gillis Gilkerson accommodate the needs of a growing practice for years to come. Pre-construction and construction services for the project were led by Gillis Gilkerson President Tyler Barnes.

"It was nice to have someone who has done dental spaces before, they understood what my needs were. This is a place I can work and be comfortable for the next thirty years. It's so bright, it's so fun, it's a classic. I'm really happy with the work that Gillis Gilkerson did for me."
