

PERDUE INNOVATION CENTER

SALISBURY, MARYLAND

Perdue Farms hired Gillis Gilkerson to complete interior and exterior renovations to their Innovation Center located at 2110 Industrial Parkway in Salisbury, Maryland. The +/- 2,400 square foot renovation project encompassed the expansion and modernization of the original building.

In addition to supplementing dry storage space, Gillis Gilkerson revitalized the Innovation Center's test kitchen by adding new appliances, cabinets, lighting, and a walk-in freezer and cooler. Additionally, Gillis Gilkerson installed a new display window giving retail clients the opportunity to see how products could be displayed in their stores.

"We're extremely pleased with the new retail test kitchen and training room at our Innovation Center in Salisbury and are proud to have partnered with local contractors to complete these renovations."
