

RETINA CONSULTANTS OF DELMARVA

EASTON, MARYLAND

Gillis Gilkerson was hired by Retina Consultants of Delmarva to complete a 5,000 square foot renovation to their building on Ocean Highway (Route 50) in Easton, Maryland. The medical office building now features a fresh and modern interior designed to improve the overall client experience.

Led by Project Manager Jared King and Superintendent Dale Reinhold, Gillis Gilkerson's construction team completed the interior and exterior renovations in only 75 days. The firm's scope of work included a full gut and renovation, entirely new floor plan along with a new roof, siding, exterior paint, trim and a new parking lot.

"It is a true honor to bring our client's vision to a reality," said Dwight Miller of Gillis Gilkerson. "We take pride in our repeat customers and thoroughly enjoy ensuring their satisfaction for years to come."

"We were looking for a new Easton office and located a building that was in a great location, but it was in considerable disrepair," said Dr. Jeffrey Benner, Retina Consultants. "As doctors, we needed a contractor that could handle all the renovations needed to turn our building into a class A medical office. Not only did the GGI team make this possible for us, but we receive compliments on the interior from our patients daily."
