

REGENCY PLACE CONDOMINIUM NATATORIUM

OCEAN CITY, MARYLAND

Gillis Gilkerson renovated the Regency Place Condominium Natatorium at 4400 Coastal Highway in Ocean City, Maryland. Renovations replaced an existing pool enclosure with a new one that included structural steel on the existing concrete slab. The structure is metal framed and has an aluminum storefront system, standing seam metal roof, aluminum railing and a metal liner panel ceiling inside with new lighting and ceiling fans. The Gillis Gilkerson team worked diligently to meet the 90-day deadline for the new pool enclosure.

"The demolition of the existing pool went smoothly. The Gillis Gilkerson team has been great at communicating with us and proved to be very timely with the project."
