

TIDALHEALTH UROLOGY & ENDOCRINOLOGY

SALISBURY, MARYLAND

TidalHealth Urology and TidalHealth Endocrinology have a new home in a brand-new structure, Woodbrooke Building 7. Woodbrooke is a multi-building medical campus located just off Route 50 in Salisbury, MD that was first established in the early 2000's on a 36-acre parcel that has quickly grown into a hub for healthcare services. Located at 1164 Woodbrooke Drive on the south-side of the complex, Woodbrooke Building 7 offers ample parking for the two practices with convenient access to additional services within the development.

The + / - 17,000 square foot building has dedicated entrances for TidalHealth Urology and TidalHealth Endocrinology, and customized layouts to accommodate the workflow of each practice. Gillis Gilkerson Project Manager Mike Truitt and Superintendents Ivan Jackson and Charlie Morris oversaw the construction of the building structure and the interior fit-outs for the medical offices. TidalHealth Urology and Tidalhealth Endocrinology each have unique configurations for their waiting areas, exam rooms, physician and provider offices, and staff support areas. TidalHealth Urology's layout additionally includes procedure rooms, a lab and a sterile processing area.

"Despite being under one roof and both a part of the TidalHealth health system, these practices are independent of each other, and come with unique needs for each specialty. The distinct layouts for each facility underscores the ability of interior fit-outs to meet the needs of a medical practice's workflow through thoughtful design." said Gillis Gilkerson President Tyler Barnes. "Gillis Gilkerson is honored to play a part in bringing quality healthcare to our community."
