

## DAVID A. BRAMBLE, INC.

EDEN, MARYLAND

David A Bramble, Inc. has been the go-to source for site and utility construction projects across Maryland and Delaware for over 65 years. When David A. Bramble, Inc. decided to renovate their Eden office, Gillis Gilkerson was honored to be entrusted to oversee the updates for one of our most trusted trade partners.

The exterior of the main office was upgraded with a combination of brick and vinyl siding veneer, as well as, all new windows and doors. The main office takes advantage of high-visibility along U.S. Highway 13, now with a polished look that will last for years to come.

The + / - 5,500 sf office building was gutted and the interior rebuilt with an eye for thoughtful design elements. The remodeled interior now features a bright, modern aesthetic with crisp white walls and stunning hardwood floors throughout the space. The hardwood floors in the main entrance atrium showcase a bold herringbone pattern tying in a custom live edge wooden reception counter. A second-floor balcony and vertical ship lap accent walls create height, to give the entrance area an open feel that is full of visual interest.

The remaining office spaces, conference room and break areas all coordinate with the design, highlighting crisp walls with hardwood floors, and touches of vertical ship lap wainscoting. The project was spearheaded by GGI Project Manager Don Murray.
