

MAPLEWOOD DENTAL ASSOCIATES

SELBYVILLE, DELAWARE

Maplewood Dental Associates turned to Gillis Gilkerson for design-build services to establish a second location for their successful dental practice headquartered in Rehoboth Beach, Delaware. The Selbyville office is conveniently located at 37124 Lighthouse Road, just 2.5 miles off Coastal Highway, offering area residents an additional access point to comprehensive dental care.

Known for their patient-centered approach, Maplewood Dental Associates uses state-of-the-art technology to offer a full scope of general and cosmetic dentistry in a relaxed and soothing atmosphere. Drs. Wright, Luckenbaugh, Townsend, Venables, Vincent and Smith have devoted their practice to restoring and enhancing the beauty of their patients' smiles with a commitment to quality and patient comfort that is evident in the design choices for their new offices.

The two-story building highlights coastal-style architecture, with metal roof and cedar shake accents on the awnings and gables that are illuminated for stunning curb appeal day and night. The interior utilizes crisp white walls, coastal accents and custom hardware to create a serene and inviting space, balanced with a technology-forward approach to patient care.

Gillis Gilkerson's involvement from the pre-construction phase enabled the + / - 7,000 sf ground-up build to begin in June 2024, with a certificate of occupancy delivered prior to year-end. Gillis Gilkerson President Tyler Barnes, Vice President of Operations Matt Esham and Superintendent Dale Reinhold were all key players in the project's success.
