

JILL PORTER CRNP, P.A.

SALISBURY, MARYLAND

Jill Porter CRNP, P.A. was able to rely on Gillis Gilkerson to provide a turnkey solution when the growing family healthcare practice needed to expand to a larger space. Gillis Gilkerson identified an opportunity for the practice to relocate to 1603 Tree Sap Court, to a brand-new + / - 4,800 square foot medical office building that was being planned at the Woodbrooke Medical Complex.

With the relationship in place early in the process, the design for new office was able to be completed prior to the ground-up construction of the building shell. This created the opportunity for customization, both inside and out, including the creation of a separate patient entrance for the practice's lab, complete with its own waiting area, while maintaining connection to the main office for staff access. Every aspect of the floor plan was designed with input from the practice, resulting in a with an interior layout that maximizes flow, efficiency and security for the office.

The new office enables Jill Porter CRNP, P.A. to continue providing its patients with the highest quality of care in a more spacious and modern facility. Located just off Route 50, the new medical office building is conveniently located and offers patients improved access to parking. The practice now includes seven exam rooms, dedicated office space for providers and support staff, and a layout that separates clinical areas from office areas and employee break areas.

"Gillis Gilkerson made it so easy for us to design the space that we felt we really needed. The whole team has been great to deal with. We would recommend Gillis Gilkerson to anyone!"
