

THE SALISBURY SCHOOL

SALISBURY, MARYLAND

Over the years, Gillis Gilkerson has completed a number of construction projects for The Salisbury School. The Wicomico County-based private school occupies a large campus on Hobbs Road, just off of Route 50 in Salisbury, Maryland, and offers pre-kindergarten through twelfth grade schooling.

In addition to constructing The Salisbury School's iconic dome, Gillis Gilkerson also managed the build of a two-story dormitory which now houses the school's foreign exchange students. The dormitory offers six bedrooms and is semi-attached to the property's original farmhouse. The project followed the school's philosophy of leading by example in terms of renewable energy. The +/- 3,182 square foot building features a Structural Insulated Panel (SIP) system as well as other sustainable energy conservation measures.

Gillis Gilkerson has led more recent renovations to parts of the school, updating the Kindergarten and 5th grade classrooms with new flooring, cabinets, countertops and paint, for a bright refreshed space.

"The Gillis Gilkerson team is very experienced, knowledgeable and able to accomplish many difficult tasks - making sound decisions when changes needed to be made. Management was always on-hand to support their on-site staff and the project was completed on time as planned. I would highly recommend Gillis Gilkerson to anyone."
