

MARINER COSMETIC DENTISTRY

OCEAN PINES, MARYLAND

Mariner Cosmetic Dentistry turned to Gillis Gilkerson when an opportunity arose for the practice to expand into an adjacent space in the Manklin Station shopping center. The adjacent unit, formerly a bookstore, offered another 1,500 square feet for the busy dental practice. Gillis Gilkerson was involved in the project from its early stages, assisting Dr. Mariner with pre-construction and design, as well as the final build-out.

The expansion carefully integrated the two spaces with a unified floor plan, while tying in HVAC, plumbing and electrical. The waiting area was expanded, with connection to both sides of the space. Five new patient exam areas were created, along with a new wet lab and sterilization area, an ADA restroom and storage areas. The expansion gives the growing practice +/- 4,000 square feet of space to serve it's clients.

All new flooring and freshly-painted trim throughout both the existing and expanded space creates a seamless feel to the new floor plan. Light blue walls with bright white accents give the space an inviting, coastal feel. Deep blue cabinetry accents reinforce the practice's maritime brand. New exterior signage and window graphics unite the spaces into one cohesive storefront.

Gillis Gilkerson President Tyler Barnes worked with Dr. Mariner through the design phase, and Gillis Gilkerson Project Manager David Erickson and Superintendent Brian Mason ensured the renovation project was completed to the highest degree of quality.
