

MID-SUSSEX DENTAL

GEORGETOWN, DELAWARE

Mid-Sussex Dental trusted Gillis Gilkerson to lead the ground-up construction of a +/- 6,000 sf dental office, when it came time for the business to invest in a larger space. After over 50 years in its original location, the independent practice recognized the need to expand, to meet the area's growing demand for compassionate dental care. Mid-Sussex Dental's state-of-the-art facility is located on Route 113 in Georgetown, and is now open and accepting new patients.

The new location significantly expands the practice's capacity, with twelve patient exam room and a spacious waiting area. A large reception window welcomes patients as they arrive, and three dedicated check-out areas offer privacy and comfort to complete payment and schedule follow-up appointments. A private consultation room is also available for patients to discuss restorative treatment options and long-term plans of care. The new facility also has dedicated space for provider offices, imaging, a laboratory, sterilization area and employee break room.

Elevated interior finishes and exterior stack-stone veneer gives Mid-Sussex Dental an attractive and high-quality aesthetic. The interior combines bright walls, blue accents and modern finishes to create a calm, inviting space with a coastal flair. Construction was led by GGI Project Manager David Erickson and Superintendent Brian Mason. The project broke ground in Summer 2025 and was completed in March 2026.
