

RIVER PARK CENTER

SALISBURY, MARYLAND

Gillis Gilkerson completed extensive renovations to transform the former Hostess Bakery Outlet in Salisbury, Maryland into River Park Center, a professional office complex. The +/- 22,000 square foot building overhaul included the installation of a new roof, updated mechanical, electrical and stormwater management systems, new landscaping and parking lot demolition and replacement.

Davis, Bowen & Friedel, Inc. (DBF), a leading local architectural and engineering firm with over 40 years in business, occupies +/- 12,000 square feet on the east side of River Park Center. The firm designed the interior and conservatory-style façade of the building, relocating its main offices to the space after many years located in the heart of Downtown Salisbury. The westernmost +/- 9,000 square foot unit is currently occupied by Salisbury Dialysis Center, a regional renal healthcare provider.

The building is situated on the high visibility intersection of E. Main Street and Ward Street in Salisbury directly across from Salisbury City Park and Salisbury Zoo. Accent colors on the facade were chosen with the picturesque surroundings in mind.
