

TIDEMARK FEDERAL CREDIT UNION

SALISBURY, MARYLAND

Gillis Gilkerson completed the interior fit-out for Tidemark Federal Credit Union's Salisbury branch location at 1305 S. Salisbury Boulevard. The +/-1,450 square foot retail space is located in the end-cap of the College Town Center development located along US Route 13 directly across from Salisbury University. Originally a Delaware-based credit union, Tidemark is rapidly expanding into the Salisbury area, with an additional branch located in 2530 N. Salisbury Blvd in North Salisbury.

"The fit out for the bank focused heavily on customization to match Tidemark's brand aesthetics, and making way for the credit union's state-of-the-art technology. The space has a great location, and a stunning exterior storefront, so the majority of our work focused on the interior finishes, and maximizing the use of the space.", said Project Manager Don Murray. "Tidemark's signature look focuses on bright interiors with inviting atmosphere."

The not-for-profit credit union was originally founded in 1959, to serve employees of the DuPont Nylon Capital Plant in Seaford, Delaware. Over the years, Tidemark Federal Credit union has expanded, now operating with a charter to serve 15,000 members in Delaware, Maryland and beyond. The full-service financial institution offers individual, families and businesses convenient technology, lower loan rates, higher dividends on deposits and fewer fees.

"We are thrilled to have this beautiful space as our first permanent branch location in Salisbury", said Paul Steelman of Tidemark FCU. "The convenient location will enhance our ability to offer excellent service to our members. Gillis Gilkerson did a fantastic job for us, we couldn't be happier with the final result."
