

THE SALISBURY SCHOOL

SALISBURY, MARYLAND

Gillis Gilkerson has completed a number of construction projects for The Salisbury School. The Wicomico County-based private school occupies a large campus on Hobbs Road, just off of Route 50 in Salisbury, Maryland.

In addition to constructing The Salisbury School's iconic dome, Gillis Gilkerson managed construction of a two-story dormitory which now houses the school's foreign exchange students. The project followed the school's philosophy of leading by example in terms of renewable energy. The +/- 3,000 sf building is LEED certified and features a Structural Insulated Panel (SIP) system, as well as other sustainable energy conservation measures.

In 2026, Gillis Gilkerson led the renovation of The Salisbury School's Lower School, one of the most significant renovations the school has undertaken since its opening. Led by Gillis Gilkerson President Tyler Barnes and Superintendent Jim Morris, the renovation replaced ductwork, flooring, casework and fixtures, and reconfigured several spaces to better suit the needs of the teachers and students. The GGI team completed two carefully timed construction phases to eliminate disruption of students and learning. The first phase tackled the updates to Kindergarten and 5th grade classrooms over winter break, with the remainder of the renovation taking place over the summer. Renovations were completed on-time, leaving teachers plenty of time to move in and get settled before students returned for the 2026/2027 school year.
